

A Major Field Services Company Greeley, Colorado

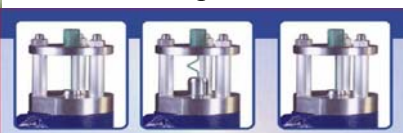

This major field service gas gathering company is installing the Rupture Pin ESV on every well connection. The ESV is protecting the flow meter and gathering system from being damaged due to over pressure and reducing emissions by shutting down the pressure source instead of relieving valuable gas to atmosphere.

Enterprise Products—Farmington, NM

Enterprise Products is installing the Rupture Pin ESV at the custody transfer point. The pins are color coded for easy and accurate replacement.
